- Parallel Milk Parlor

### Auctioneer Note:

The Kisst Dairy has been in business for the last 37 years. Their continuous goal along with growth has been to breed high production, good uddered cows that work and stay in the herd year after year. If you need top genetics, good uddered cows with top production, you won't want to miss this sale. John has always thrived on using the best genetics money could buy. Take advantage of this great opportunity to buy the very best of cow families.

---

April 12, 2024

To Interested Buyers,

Mid Valley Large Animal Service has provided veterinary care for John Kisst Dairy for decades. I have had the opportunity to work with the dairy for the last 16 years. During my time there, I have noticed that the owners and staff at the dairy have been dedicated to breeding for efficient, hard-working cows. The Kisst family has also bred for type with the Kisst children taking many cows to local fairs as well as shows throughout the country. The dairy has generations of cows that have been classified as excellent or very good.

The herd is reproductively managed using double ovsynch on fresh cows and ovsynch on open cows. Fresh animals are given BoviShield Gold 5 L5 at 1 month fresh to help with reproduction. Cows are given J5 vaccine following label direction to help prevent mastitis. Fresh cows and cows with mastitis are milk sampled to prevent pathogens from entering the herd. Cows are also given a clostridial vaccine (Covexin 8 before it went on backorder, more recently UltraBac 8) before going dry.

Given the high level of genetics and management behind these cows, these animals would be a great addition to any herd. I encourage you to consider adding some (or all) of these animals to your herd.

Sincerely,

Carlos Borges DVM
