RE: Meadowlake Dairy dispersal sale October 16, 2026

To Whom It May Concern,

The veterinary team at Valley Veterinarians Inc. has been providing herd health services for Meadowlake Dairy since its inception. Regular palpation and herd health visits have occurred on a biweekly basis with all cows being checked for pregnancy between 36 and 49 DSLH and all pregnancies being reconfirmed around 150 DCC. All the dry cows and closeup heifers were reconfirmed pregnant by Veterinary palpation on October 8, 2026. All records are kept according to industry standards using DC305.

The reproduction program has followed a standard pre-sync/ovsync protocol with all cows being bred via artificial insemination by 80 days in milk. There are absolutely no live bulls used in the milking herd. During the cooler months of the year the first lactation cows were bred with female sorted semen on the first service.

All fresh cows and clinical mastitic cows are routinely sampled and submitted to the Valley Veterinarians Milk Quality Lab for comprehensive bacterial culture including Sterp ag, Staph aureus, Mycoplasma spp, and environmental organisms. Recent bulk tank samples were culture negative and PCR negative for all relevant contagious mastitic organisms including Staph aureus and Mycoplasma bovis.

Meadowlake Dairy employs a robust herd vaccination protocol including a 10-way modified live vaccine for all fresh cows and a comprehensive, multivalent dry cow vaccine. All heifers are vaccinated with RB-51 for brucellosis, as well as a multidose modified live respiratory vaccine and multivalent pinkeye vaccine.

Meadowlake Dairy uses standard treatment protocols for regular medical conditions and follows all recommended withdrawal times. All animals submitted for sale were found to be in good health at the time of the last evaluation. All animals tested negative for Bovine Tuberculosis and meet the requirements for interstate transport with specific group health certificates available upon request after the completion of the sale.

In summary, all animals being offered for sale at the Meadowlake Dairy dispersal sale on October 16, 2026 have been evaluated by the Valley Veterinarians Inc. veterinary staff to be healthy and fit for sale. Although unforeseen medical conditions and pregnancy loss may occur

between the time of evaluation and the sale, we trust that the dairy management team will do what is required to address all issues in the appropriate manner as they arise.

Thank you for your consideration in purchasing these animals.

Sincerely,

A handwritten signature in black ink, appearing to read "Joshua Krumheuer".

Joshua Krumheuer, DVM
